INCORPORATE IMPLANT DENTISTRY SUCCESSFULLY IN YOUR PRACTICE.

At the Engel Institute we give you the **KNOWLEDGE** needed to incorporate implants into your practice. This is accomplished by taking you through every aspect, from **TREATMENT PLANNING** to **FINAL RESTORATION**. You will leave with the **CONFIDENCE** needed to **START PLACING IMPLANTS IMMEDIATELY**. This is because **EVERY ATTENDEE** places an implant in a **LIVE PATIENT!**

COURSE DESCRIPTION

Doctors are you thinking about placing dental implants? To achieve an implant based practice you first need the basics of implant placement and preparatory procedures to build a safe, predictable implant strategy.

This program combines lecture with surgical hands-on techniques in grafting and placement of implants using artificial mandibles. As well as outlining the key considerations to incorporate implant economics and marketing for a formidable foundation to an implant based practice.

COURSE OBJECTIVES

Learn the basics of diagnosis, treatment planning, post-op considerations for implants and bone augmentation, key implant strategies for extractions and immediate implant placement.

We provide an understanding of bone grafting and barrier materials, as well as the indications for each type. Gather the tools necessary to incorporate and market your practice in implants and preparatory procedures.

ENGEL INSTITUTE™

Dental Implant Training

A Mentoring Approach Continuum
With Participants Working On Live Patients

OUR FOUNDER

TODD B. ENGEL, DDS

Dr. Engel obtained his Doctorate of Dental Surgery from the University of the Pacific. He maintained a successful private practice for 10 years in Ladera Ranch, California specializing in dental implant rehabilitation; CT guided surgical design and complex treatment planning.

Dr. Engel is a Diplomat of the ICOI, and an active member of AO, AAID, AACD, ADA, CDA, and OCDS.

The exciting live, hands-on courses offered by the Engel Institute™, formerly Ladera Ranch Implant Institute, provide an unsurpassed opportunity to not only learn implant dentistry, but how to integrate this treatment option into your practice. This course entails two pre-surgery days, highlighting strategies on safe and predictable implant placement, followed by live procedures where participants work on live patients.

The Institute's mentoring approach to learning offers a low faculty-to-student ratio with full assistance throughout your pre-surgical work-up and step-by-step live surgery. Courses take place in a state-of-the-art private practice, utilizing the latest dental technologies to ensure safety and success for both you and the patient.

"This is the best course that I have taken in my 25 year career. I wish I had this knowledge years ago, there's nothing like it!"

— Robert Simmons, DDS, Greensburg, KY

"Dr. Engel teaches in a manner that is easy to understand and implement in my practice beginning Monday morning."

— Dennis Kudlik, DDS, Fullerton, CA

"The opportunity to perform a live implant surgery under the guidance of the faculty was invaluable. I'd refer this course to my colleagues without hesitation."

— Frank Grimaldi, DDS, San Francisco, CA

"This course changed my practice by giving me the skills to offer implant therapy to my patients. I thoroughly enjoyed Dr. Engel and his instruction."

— James Jenkins, DDS, Bluffton, SC

"The pearls that I learned from Dr. Engel have invigorated my practice and changed the way I approach treatment planning. It is absolutely amazing!"

— Travis Hampton, DDS, Covington, GA

Live Patient Surgery
**Hear It,
See It,
Do It**

MENTORING 1 PROGRAM OVERVIEW

DAY ONE

Incorporating Implants Into Your Practice

- Risk management practices related to charting and informed consent
- Implant economics, marketing and building an implant practice

Safe and Predictable Implant Strategies

- Implant Protocols and Limitations
- Diagnosis and Treatment Planning
- Radiographic Interpretation
- Anatomical Considerations, Including Soft and Hard Tissue

Extractions and Immediate Placement

Keys to Esthetic and Functional Results

- Restorative Options
- Post-Op Considerations

DAY TWO

Pre-surgical Case Review and Strategy with a Mentoring Doctor

Hands-on Model Surgery

Restorative Instruction

Hard & Soft tissue regeneration techniques

DAY THREE

LIVE DEMO Surgery by a Mentoring Doctor

LIVE PATIENT Surgery by Participants

Post Operative Case Presentation
